The screenshot shows the vSphere Client interface for a virtual machine named 'standalone-12'. The interface includes a left-hand navigation pane with a tree view of the datacenter and its contents. The main area displays the VM's summary, including its guest OS (SUSE Linux Enterprise 12), compatibility, and hardware configuration. Key statistics such as CPU usage (336 MHz), memory usage (819 MB), and storage usage (10.59 GB) are shown. The 'VM Hardware' section lists components like CPU (2 CPUs), Memory (8196 MB), Hard disks (10 GB and 4 GB), Network adapter, CD/DVD drive, Video card, and VMCI device. A 'Recent Tasks' table is visible at the bottom of the interface.

Task Name	Target	Status	Initiator	Queued For	Start Time	Completion Time	Server
Rename virtual machine	vSphere Web Client Applen...	Completed	VSPHERE.LOCAL\Administrator	7 ms	3/7/2016 5:40:40 PM	3/7/2016 5:40:42 PM	sc-rdops-vm01
Power On virtual machine	standalone-1	Completed	VSPHERE.LOCAL\Administrator		3/7/2016 5:39:31 PM	3/7/2016 5:39:32 PM	sc-rdops-vm01
Initialize powering On	Datacenter	Completed	VSPHERE.LOCAL\Administrator	40 ms	3/7/2016 5:39:30 PM	3/7/2016 5:39:31 PM	sc-rdops-vm01
